Dear Harlan:

I would like to take this opportunity to thank you and all of the Gleeson employees for the outstanding work that went into the SFP Bakery Remodel in Marshall. As you are aware, this remodel took place in an area where we had two active product lines, which could only be down for a short period of time. Even though the project ran into several delays and appeared as if we would not be completed on time, the bakery was completed on schedule and ready for production. The commitment made by everyone involved from Gleeson to complete this project within our timeline was greatly appreciated. Commitments like these help us ensure that we continue to meet the needs of our customers.

Respectfully yours,

Mohamed Basma  
Director of Engineering
